EXPERIENCE

README

FULL STACK ENGINEER

2023-present

Builds tools for team to manage and create documentation, monitor APIs, and study their users' interactions

- o Technical Lead for companywide billing redesign. Rearchitected the metrics billing platform resulting in a 200% increase in customer signups in the calendar year.
- o Optimized customer search experience to improve search times from 10s to around 0.3s, including integrating AI-driven tooling
- o Established as subject matter expert in readme's metrics platform software.
- o Maintained and managed company's enterprise product.
- o Managed outside contractors.

LITTLE SPOON

FULL STACK ENGINEER

2020 – 2023

Clean, quality customizable toddler and baby food delivery service.

- o Built centralized product merchandising management system to allow outside teams to maintain complex product data without engineering support
- o Designed a scalable cartonization system to determine optimal packaging solution for orders, along with a caching solution to decrease business expenses
- o Established as a specialist for the business's internal tooling software.
- o Led site reactivation experience improvements resulting in increased churn for returning customers
- o Headed a cross-department initiative to prioritize and improve accessibility compliance

INVALUABLE

SOFTWARE ENGINEER II

2017 – 2020

An online auction marketplace for auctions, art, and collectible items along with providing custom business software for auction houses.

- o Rearchitected React client side rendered app to be client and server side rendered, improving performance and SEO and increasing the number of page views by 4 times in 4.5 months
- o Mentored fellow engineers on assistive technologies and accessible programming standards
- o Designed, coded, and tested session management while managing legacy session deprecation
- o Optimized and refactored legacy applications

EDUCATION

WELLESLEY COLLEGE

2017

PERSONAL PROJECTS

BELLANIKOM.COM

Created personal website with Create React App. Designed a page visualizing personal travel destinations with interactive pop-ups using Mapbox GL JS. Deployed using Netlify.

WHATS YOUR SHARE?

Designed an algorithm to calculate rent based on sq. footage of apartment. Built a react app UI for a broader audience usage.
